

Multi-1/LPCle

Overview

Easily add additional serial ports to your system. The Multi-1/LPCle is equipped with SystemBase's powerful semiconductor – SB16C1052PCI, to deliver maximum performance up to 921.6Kbps with the world's leading 256 byte FIFO preventing overrun errors. Combine that with the need for fewer components and you get cost-effective and reliable connections to your serial devices. The Multiport boards support most Windows and Linux operating systems and include 15,000 volt surge suppression eliminating blown ports. The Multi-1/LPCle has an on-board DB9 connector and is available in two models, RS232 and RS422/RS485 (COMBO). These boards are ideal for POS, hospitality, factory automation and building automation applications.

Power to the port

The Multi-1/LPCle is configurable to deliver +5 or +12 volt power to pin 9 to power external devices. This functionality is ideal for connecting low power devices such as barcode readers and receipt printers eliminating the need for an external power supply.

15KV Surge Protection – Built-in:

Don't risk blown ports and down time. The Multi-1/LPCle has built-in 15,000 volt surge suppression to protect against electrical spikes and blown ports giving you more reliable communications.

Specification

BUS Interface

Specification	PCI Express Base Specification 2.0
---------------	------------------------------------

Serial

Interfaces	RS232, RS422, RS485
Number of ports	1
Communication Speed	Up to 921.6kbps
Signals	RS232: TX, RX, DTR, DSR, RTS, CTS, DCD, RI, GND RS422: TX+, TX-, RX+, RX- RS485: TRX+, TRX-
Protection	15kV Surge protection
Flow Control	RTS/CTS, XON/XOFF
Data crash prevent	Auto Toggling

Hardware

Controller	SB16C1052PCI
Board Connector	DB9 Male

Software

O/S	Windows 2000 (32-bit) Windows XP/Vista/7 (32/64bit) Windows Server 2003/2008 (32/64-bit) Linux, SCO Unix
-----	---

» Features

- 1 port serial communication card
- PCI Express Base Specification V1.1 & V2.0 support
- RS232 or RS422/RS485(COMBO) serial interfaces
- The world's leading 256 byte FIFO
- Communication speed: Up to 921.6kbps
- Power to the pin - deliver +5 or +12V to pin 9.
- Auto Toggling: Automatic control of BUS I/O for RS422/RS485
- Slew-Rate limit control
- 15kV Surge protection

Environmental

Operation Temp.	0 ~ 55 °C
Storage Temp.	-20 ~ 70 °C
Humidity	5 ~ 95% Non-Condensing

Approvals

CE, FCC, KC
