Safe and Easy to Use

Communication Distance 130m

(no obstructions and ideal conditions)

Highest Flame-retardant

The highest flame retardant grade V-0 device enclosure.

Split CT Sensor is Safer and More Flexible

No physical contact with live wires, eliminating the risk of electric shock. Just release or close the latches on the side of the sensor to open and close the CT sensor.

Products You Can 100% Trust

Go through various rigorous tests, including lightning and surge test, short circuit test, drop test, salt spray test, test in extremely harsh environments, etc. Each component is tested to ensure that the product will not shock even in the event of a malfunction, will not burn or catch fire, and that no parts reach high temperatures that could cause a fire in the surrounding area.

Real-Time Energy Monitoring

Install in the electrical circuit panel of your home to monitor the power consumption of household appliances or rooms.

Voltage measurement range:

AC 100V~240V

Current measurement range:

AC 0A~100A

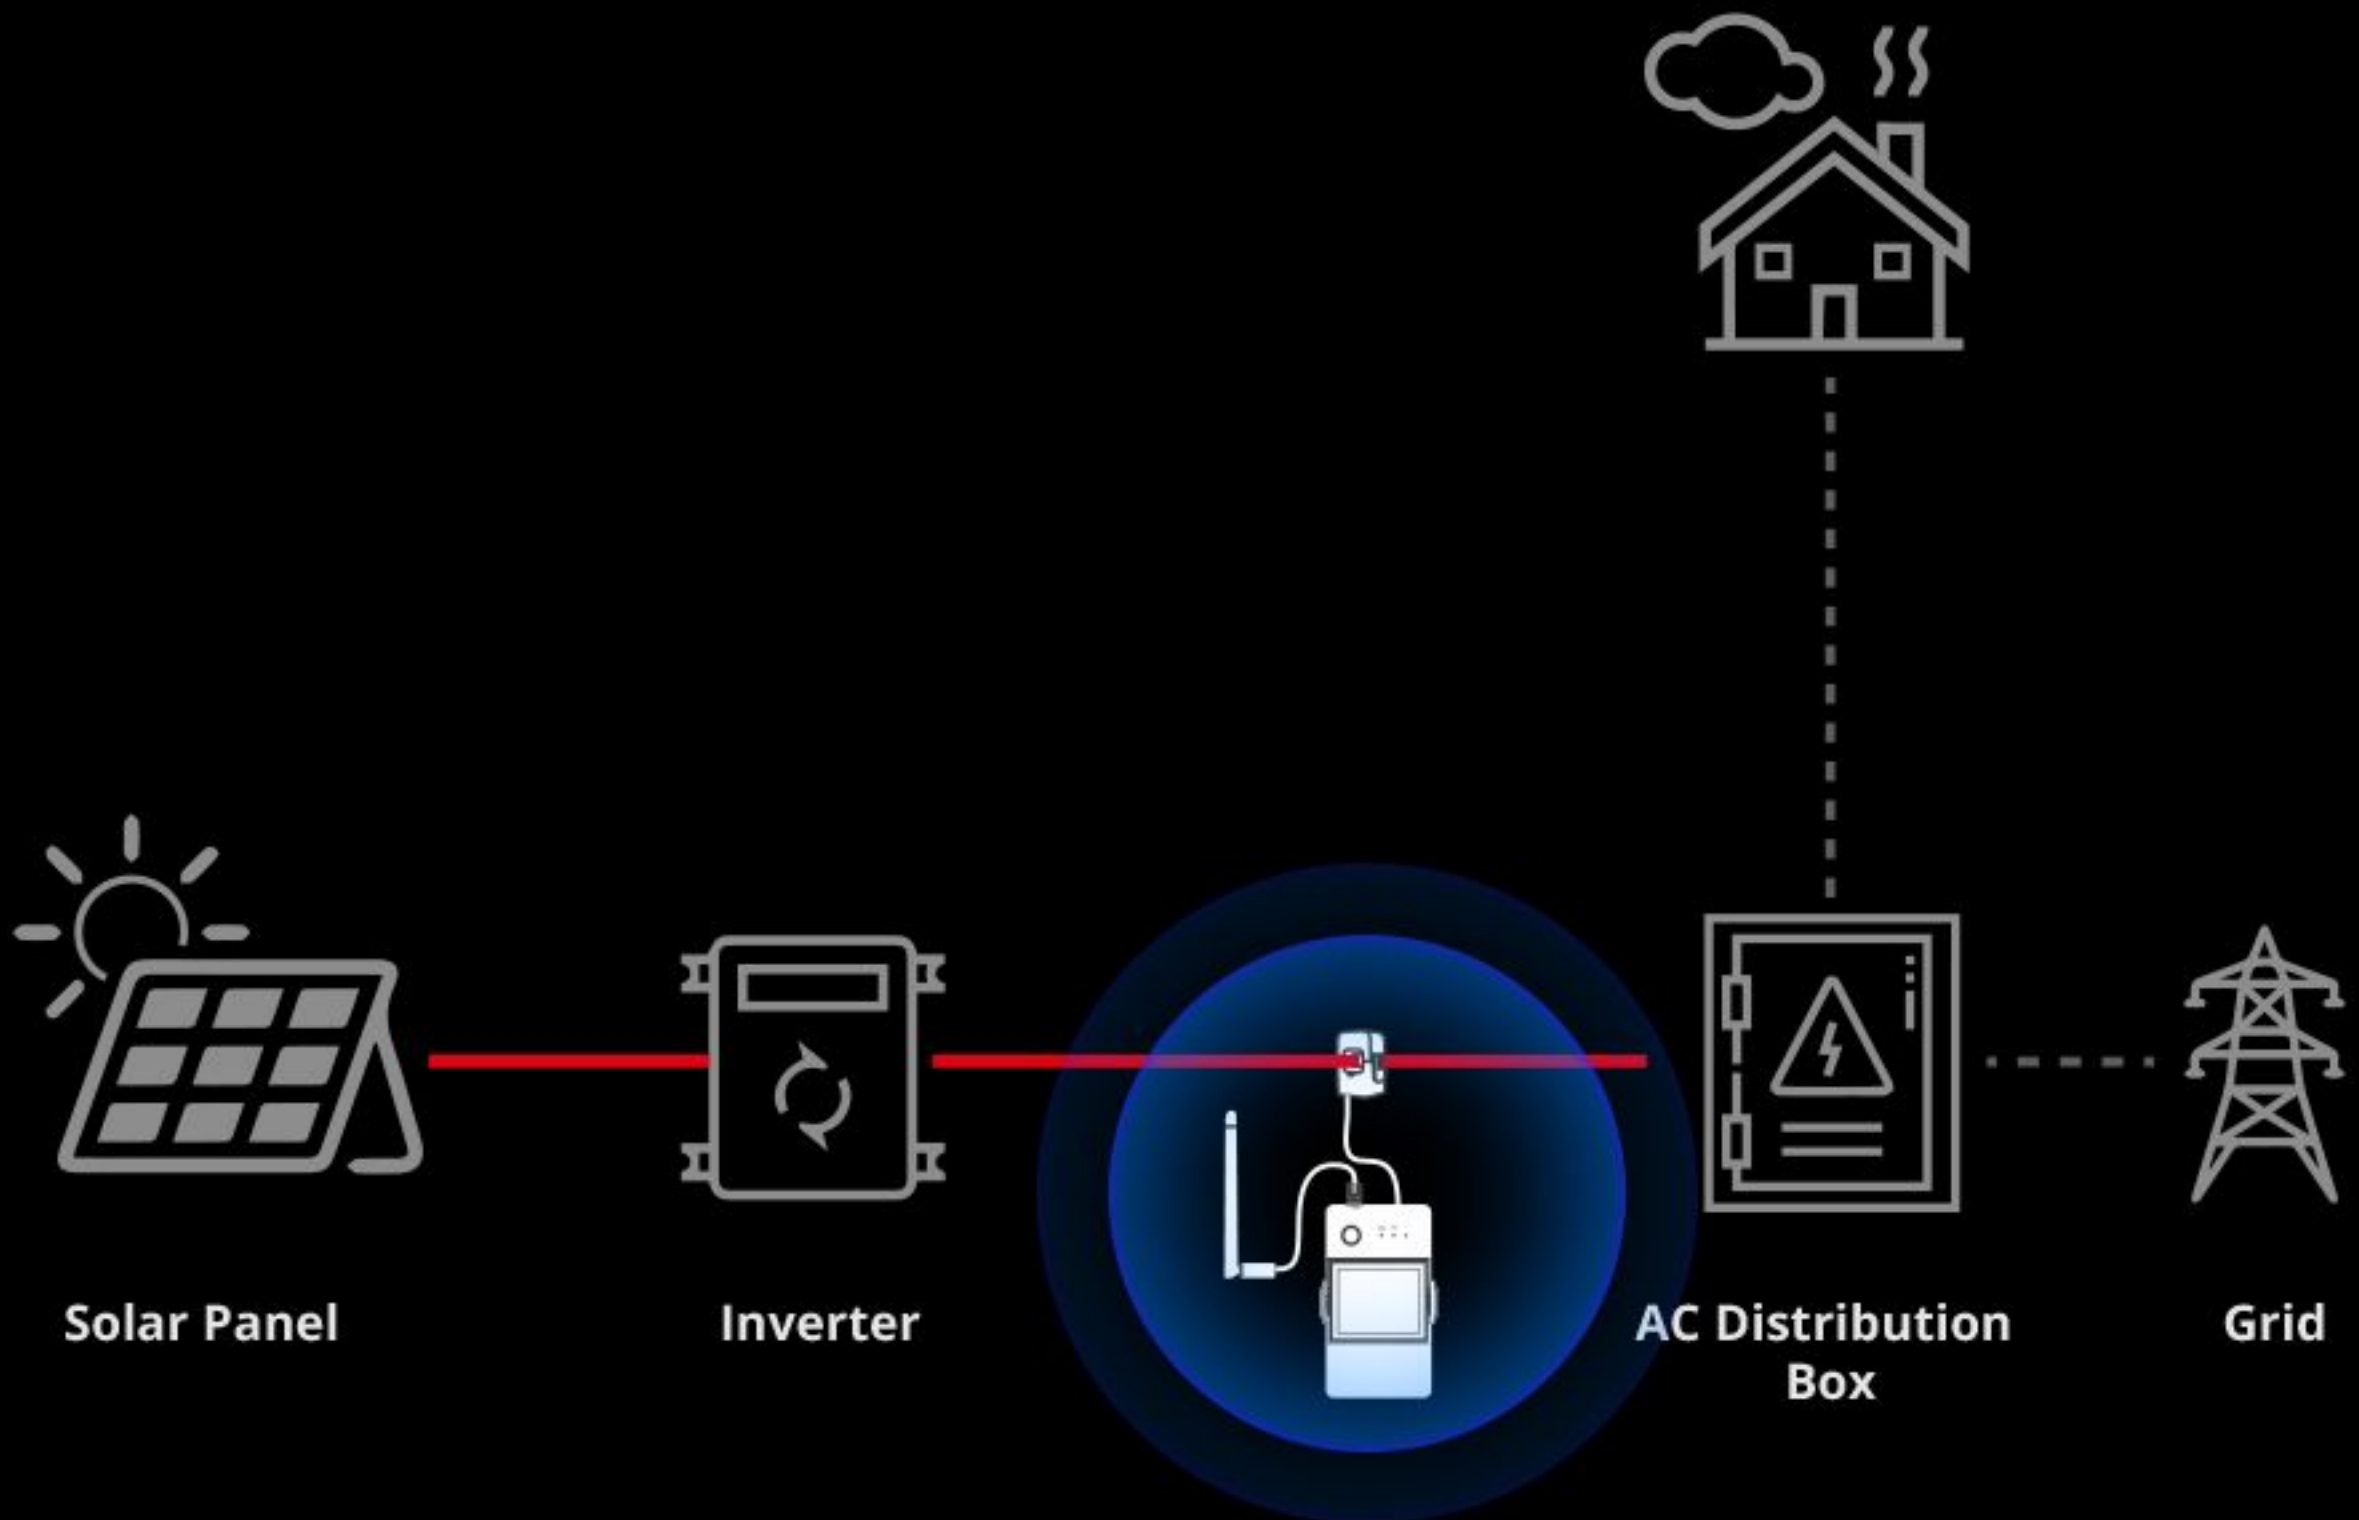

Power measurement range:

0W~24000W

Solar Panel Monitoring

It supports monitoring the power consumption of solar panel and you can see how much power your solar panels have generated at a glance.

Smart Scene

When today's solar panel power consumption exceeds 30kWh, it can help you reduce your electricity bill by setting smart scenes to turn off non-essential household appliances.

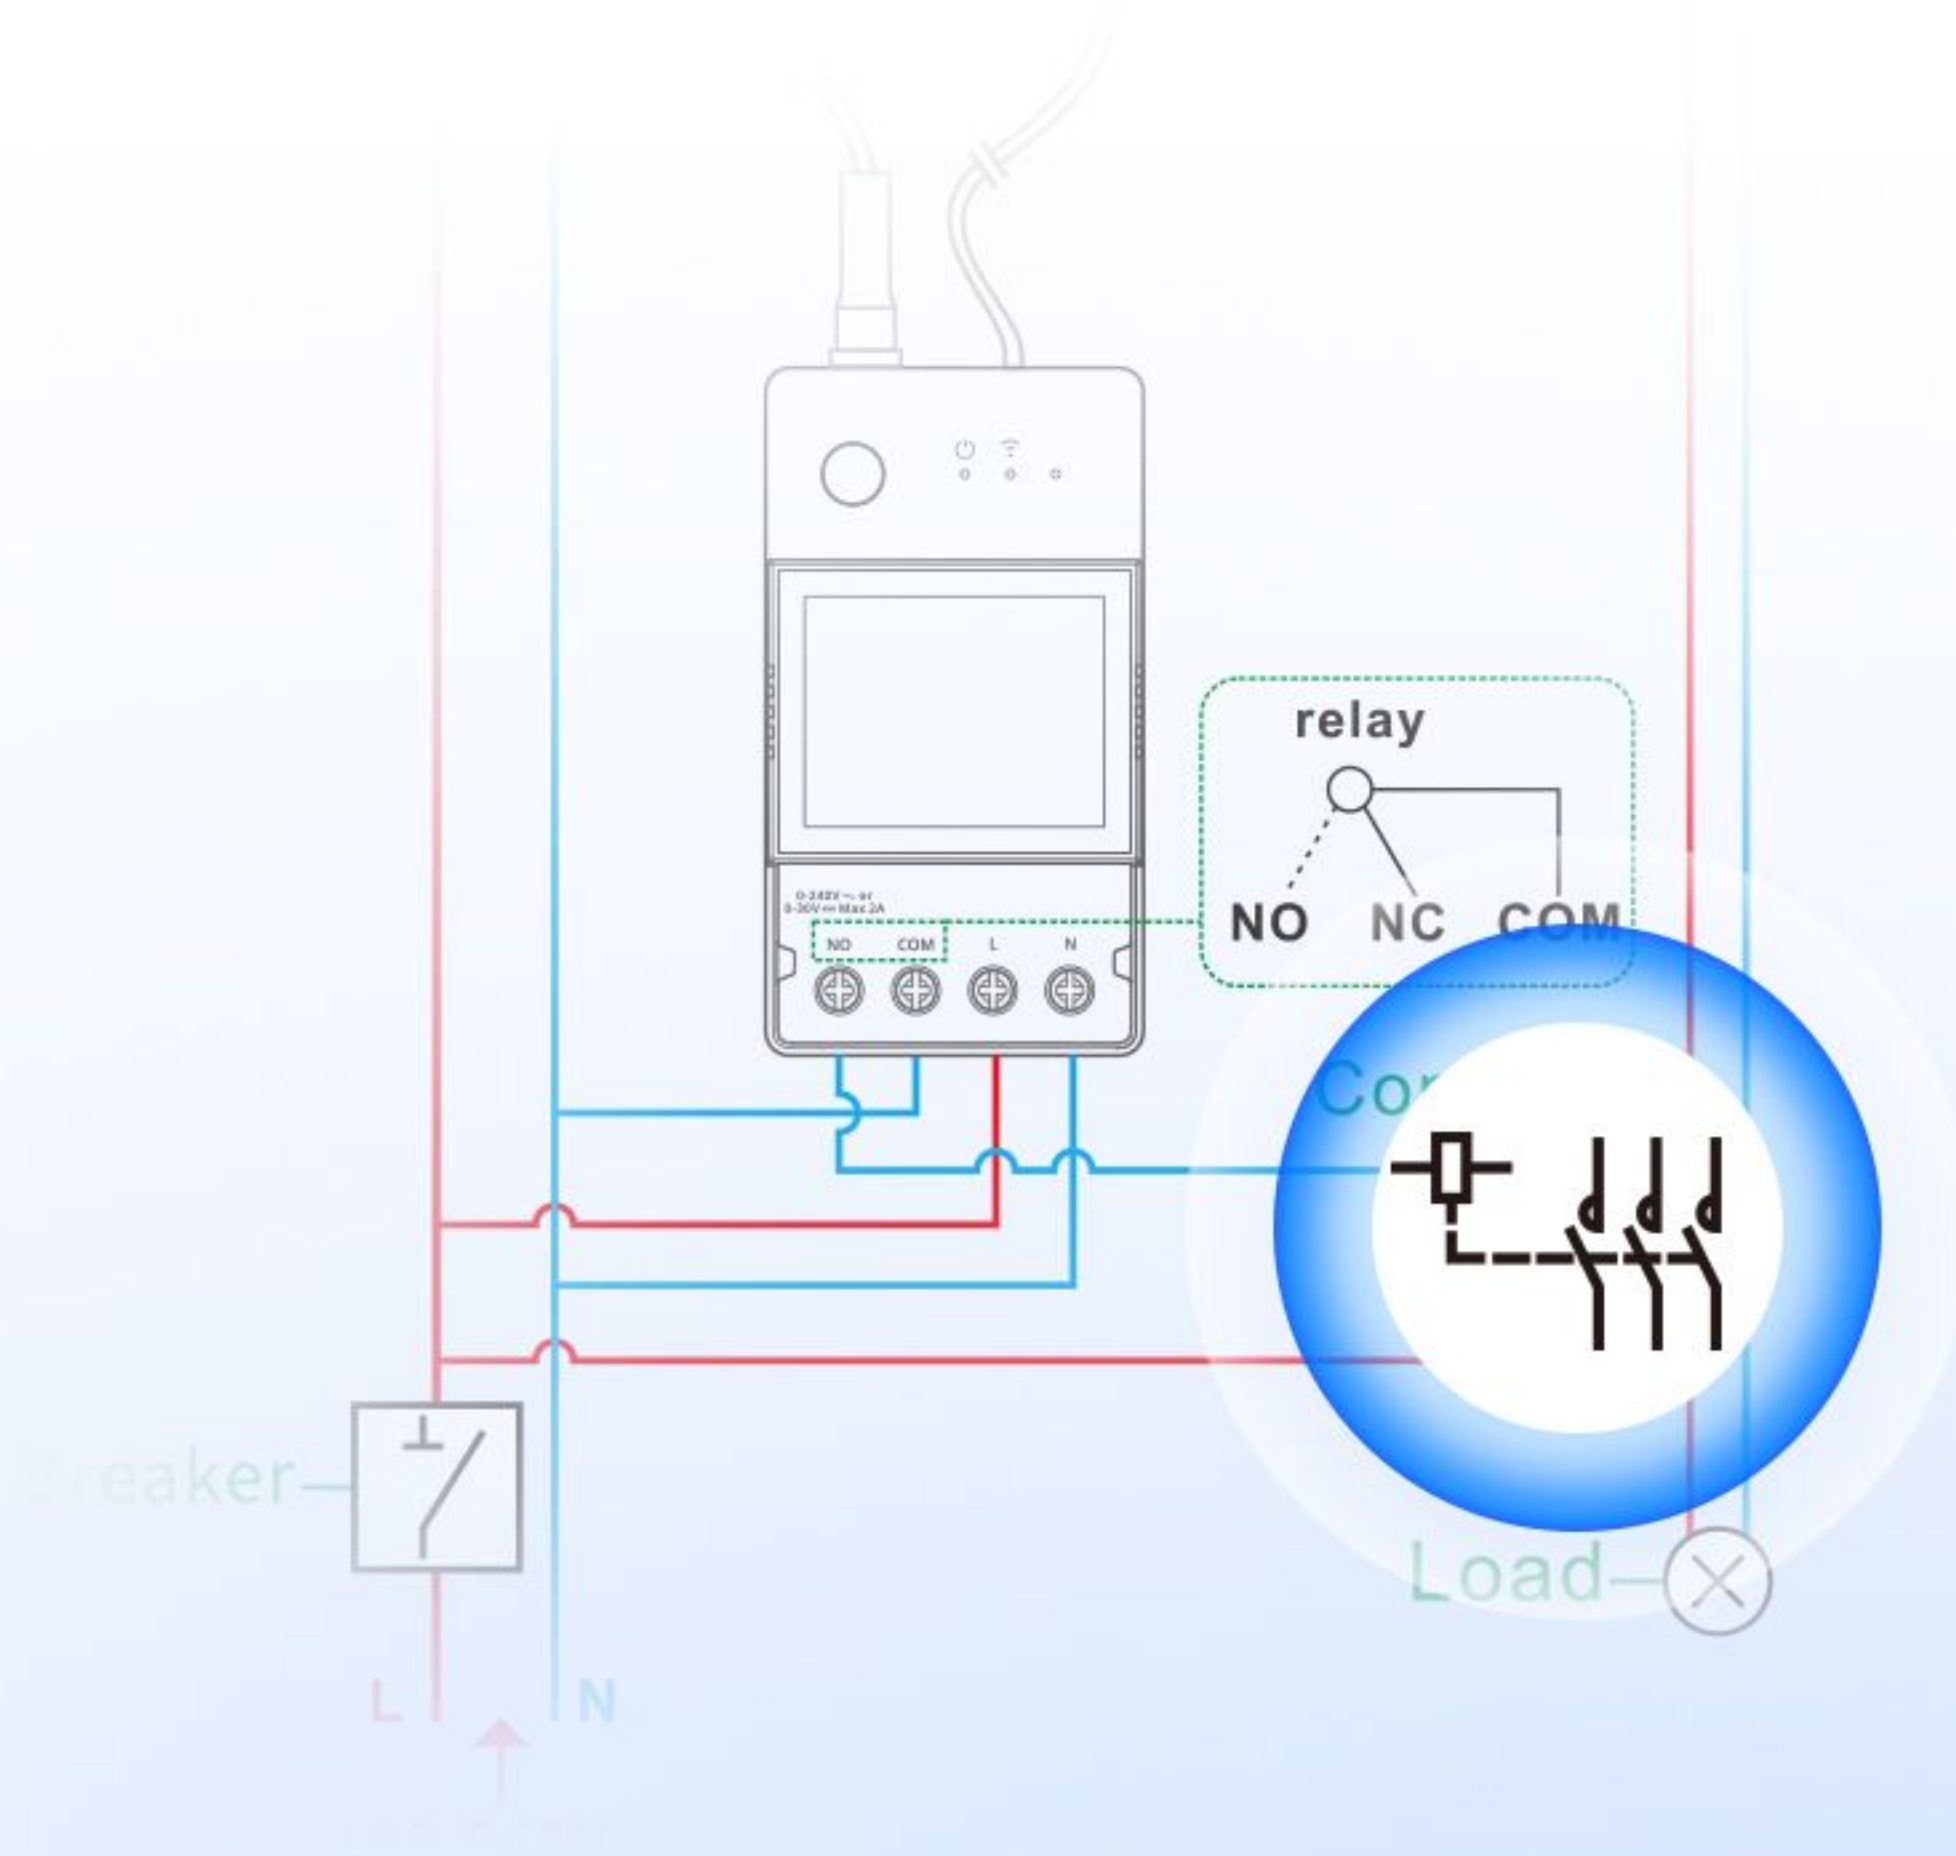

6-month Historical Data Hold

Automatically save your electricity usage data when you remove appliances or have a power outage. The data can be saved for up to 6 months and exported to a file for viewing.

Support Contactor Control

POWCT has a relay with a rated current output of 2A, which is used with a contactor to realize switching control of the load.

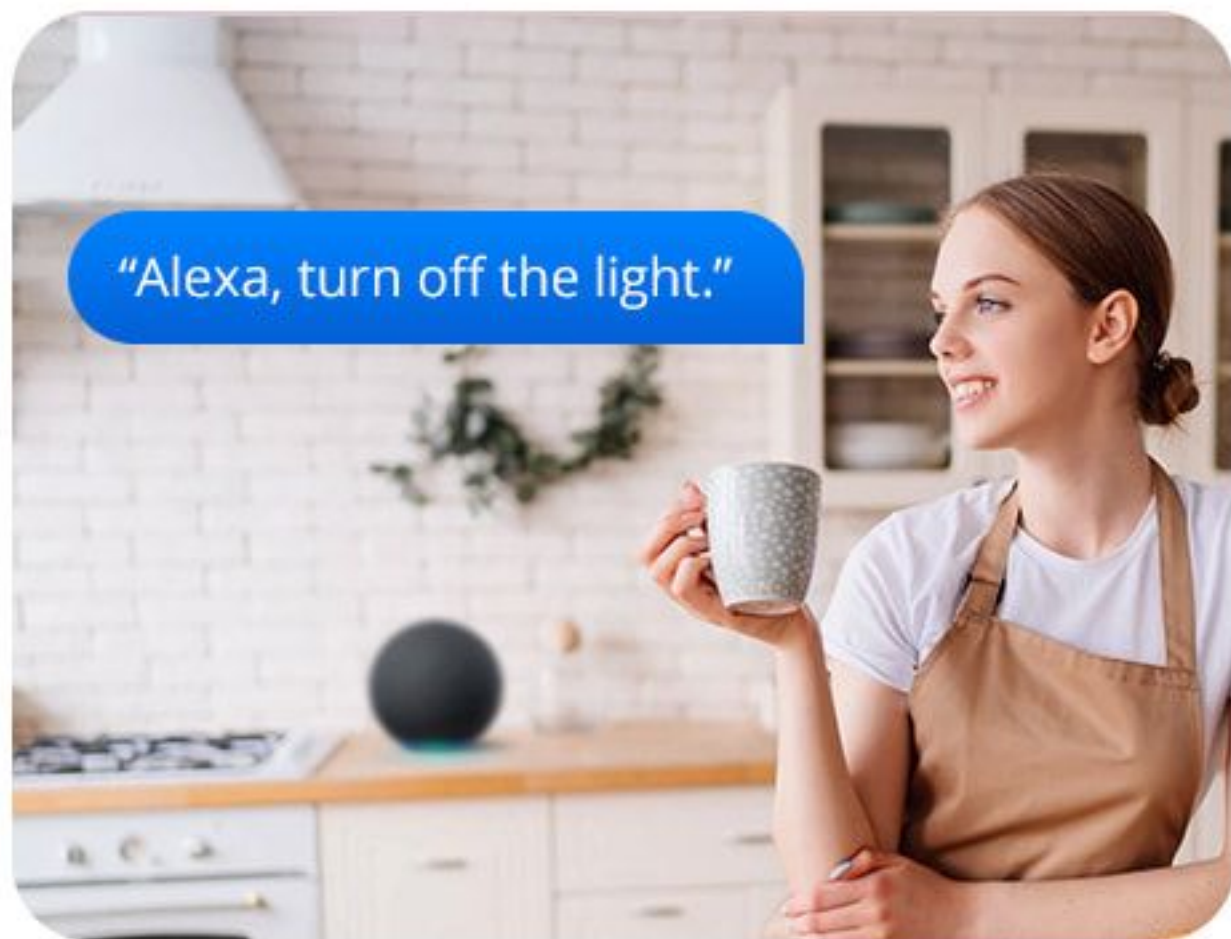

Wi-Fi Operating

No hub is required,
connect to your Wi-Fi network.

Set Timers

Set a timer to turn appliances on or off.

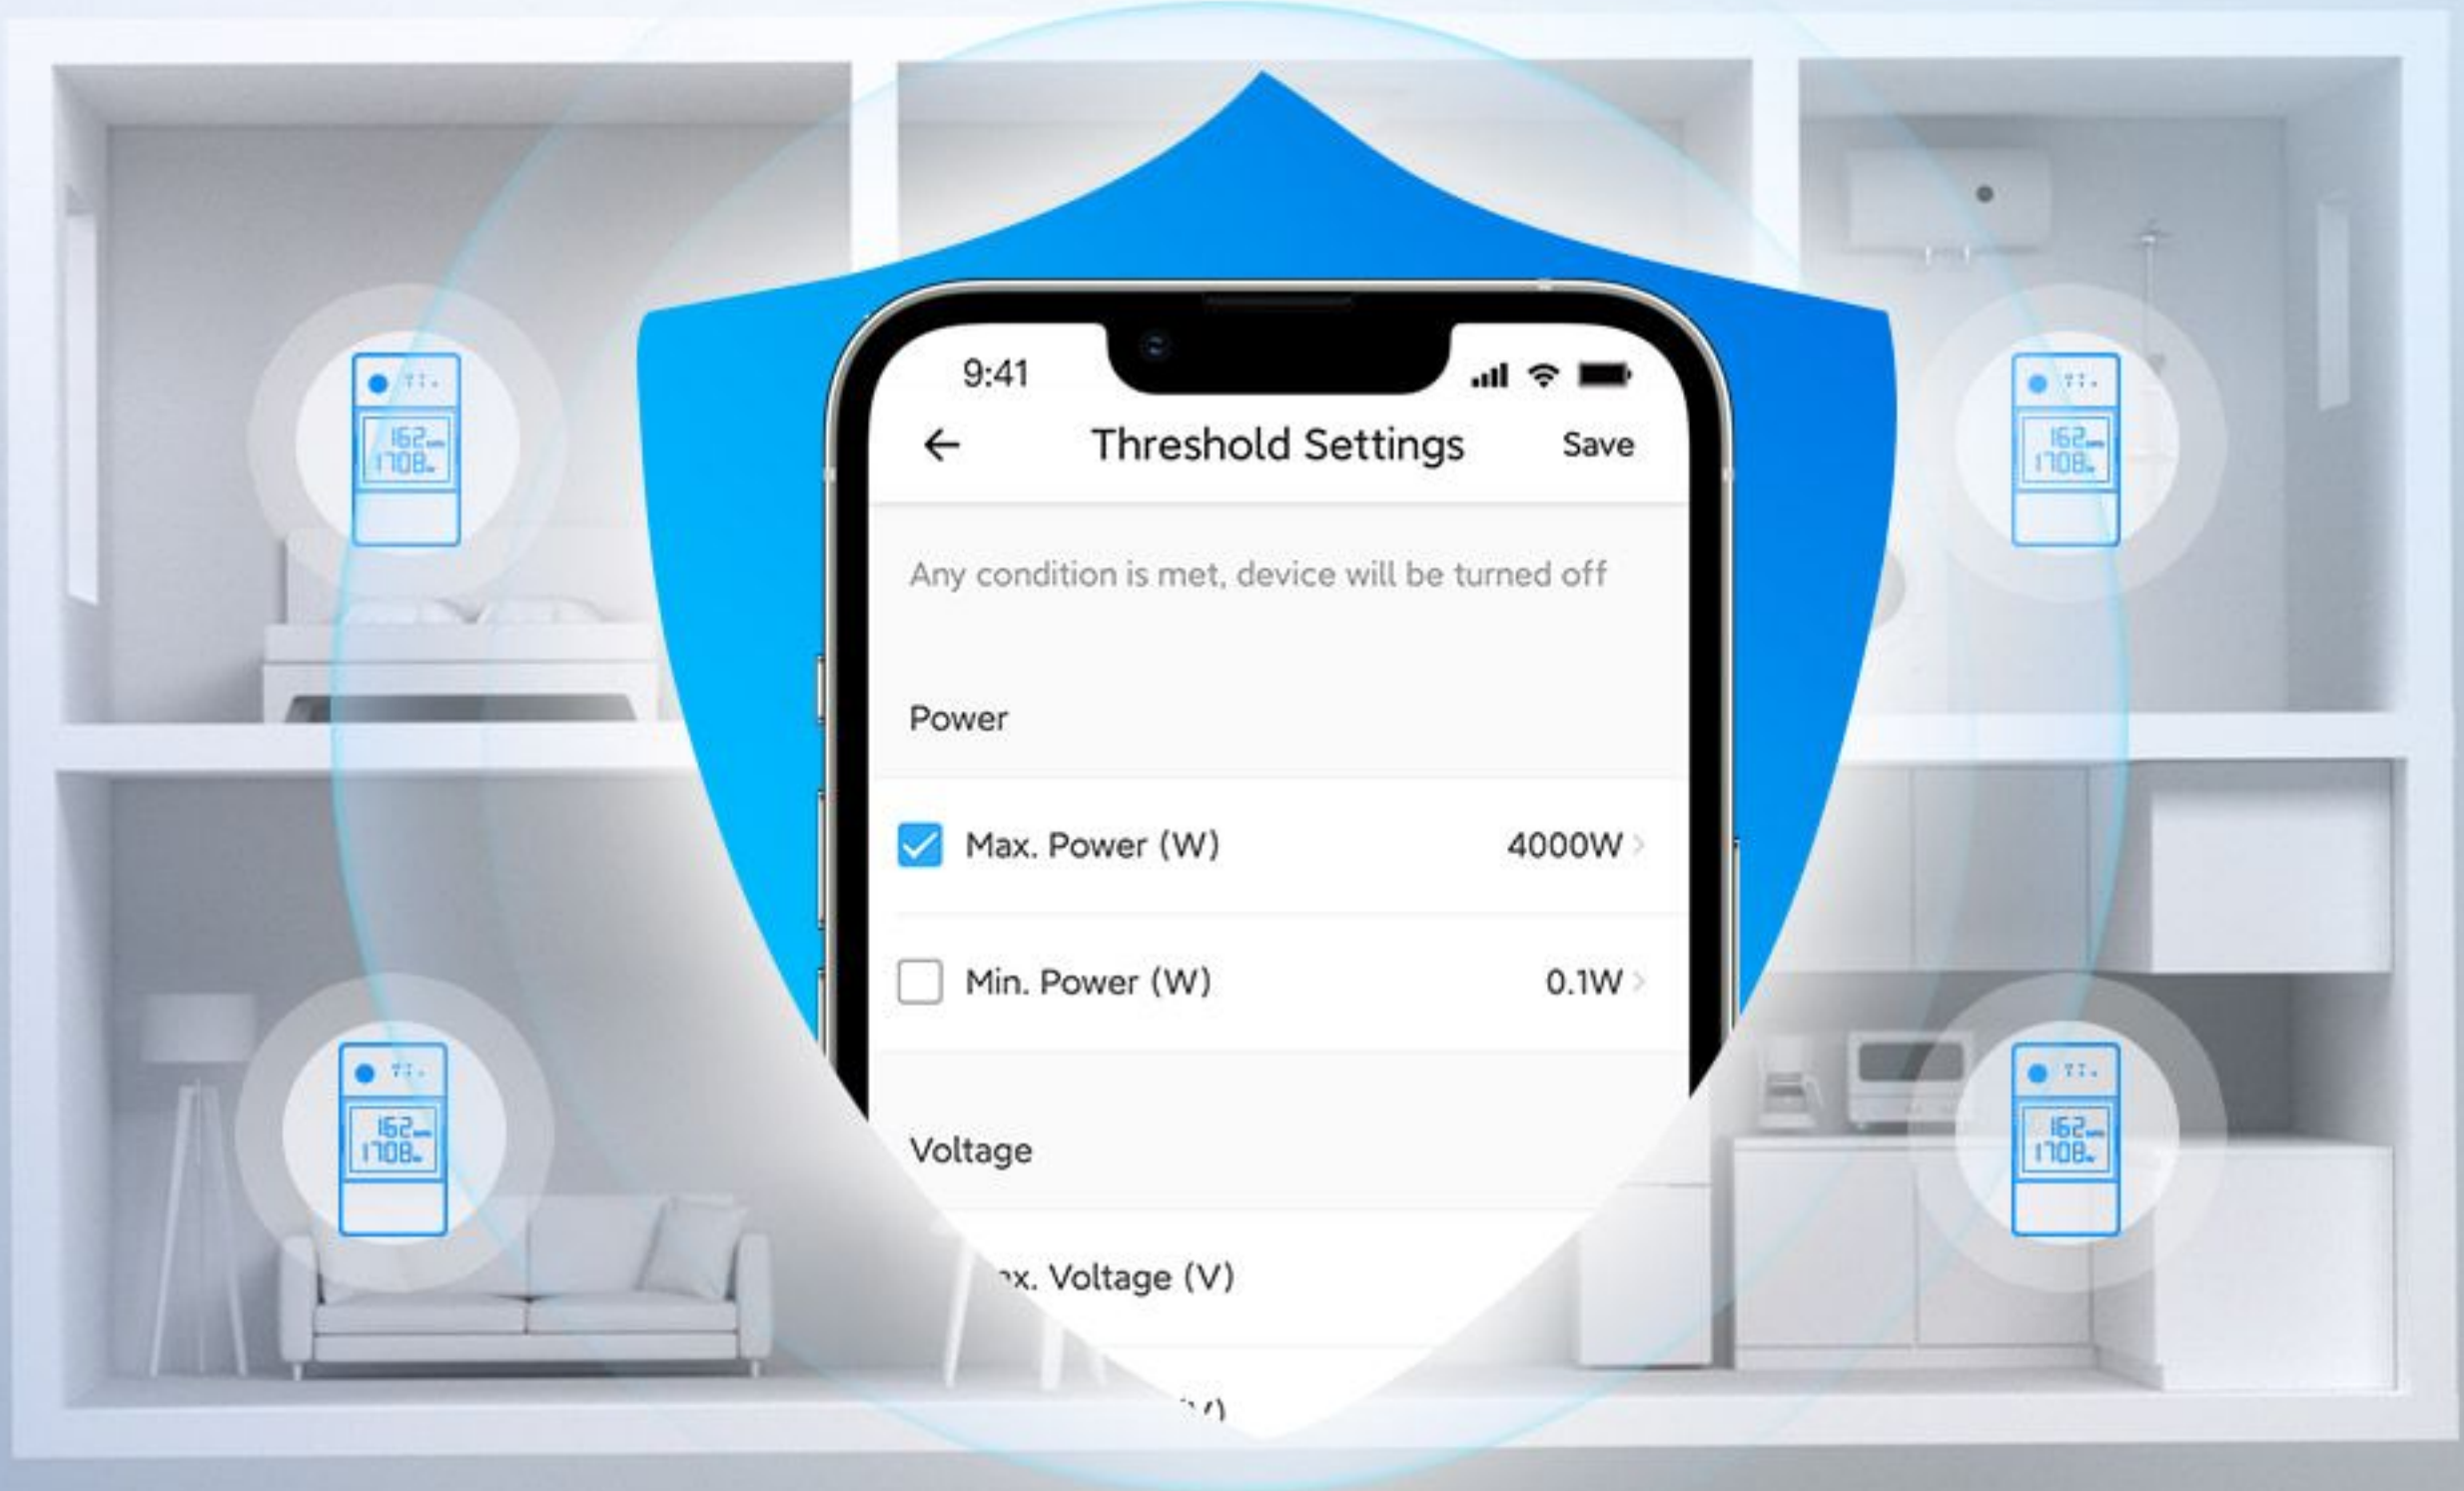

Voice Control

Manage your devices with simple commands.

Overload Protection

Set three parameters threshold power, voltage, and current by yourself, once any condition is met, the device will be turned off to protect your appliances.

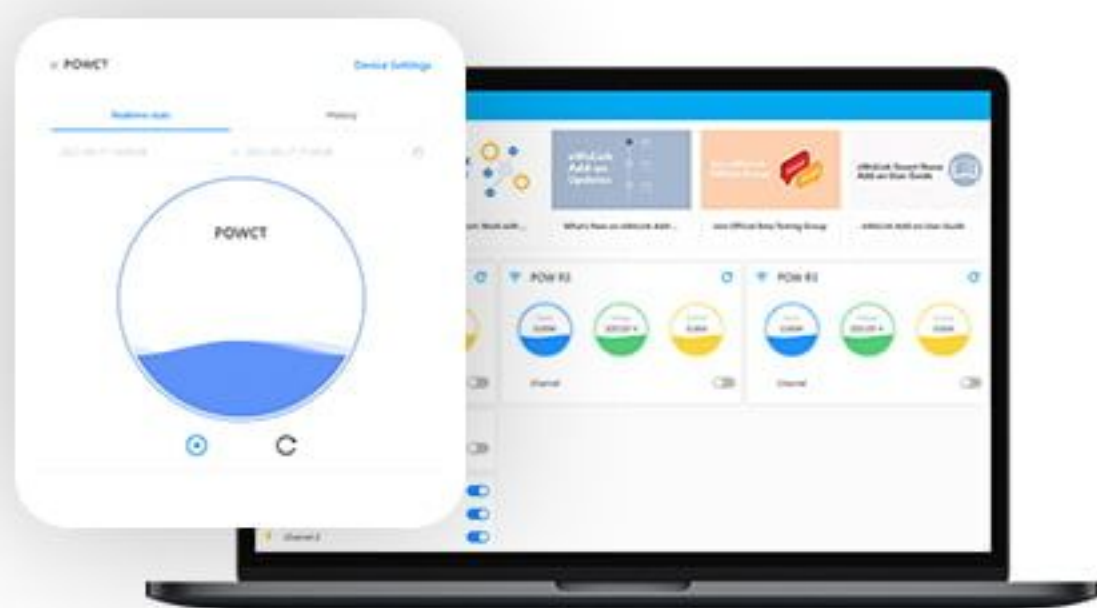

*Execution of this function requires connection of contactor.

Push Notification When Consumption Goal is Reached

Notify you when the power consumption exceeds a threshold value that you set, both today's goal and the current month's goal thresholds can be set.

Add to Home Assistant

Metadata and power consumption are displayed on Hass through eWeLink add-on.

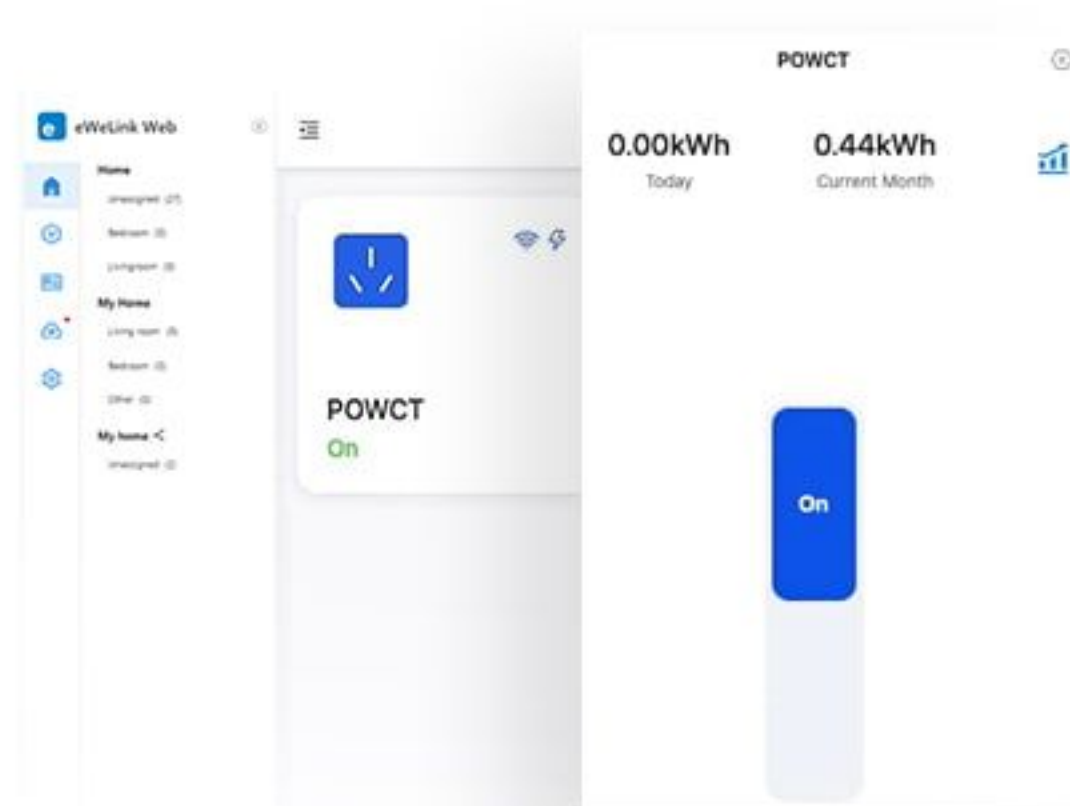

Compatible with IFTTT

Build more actions you expect with IFTTT-supported apps and services.

*This feature is part of eWeLink Advanced plan.

Support Adding to iHost by "eWeLink Smart Home Add-on"

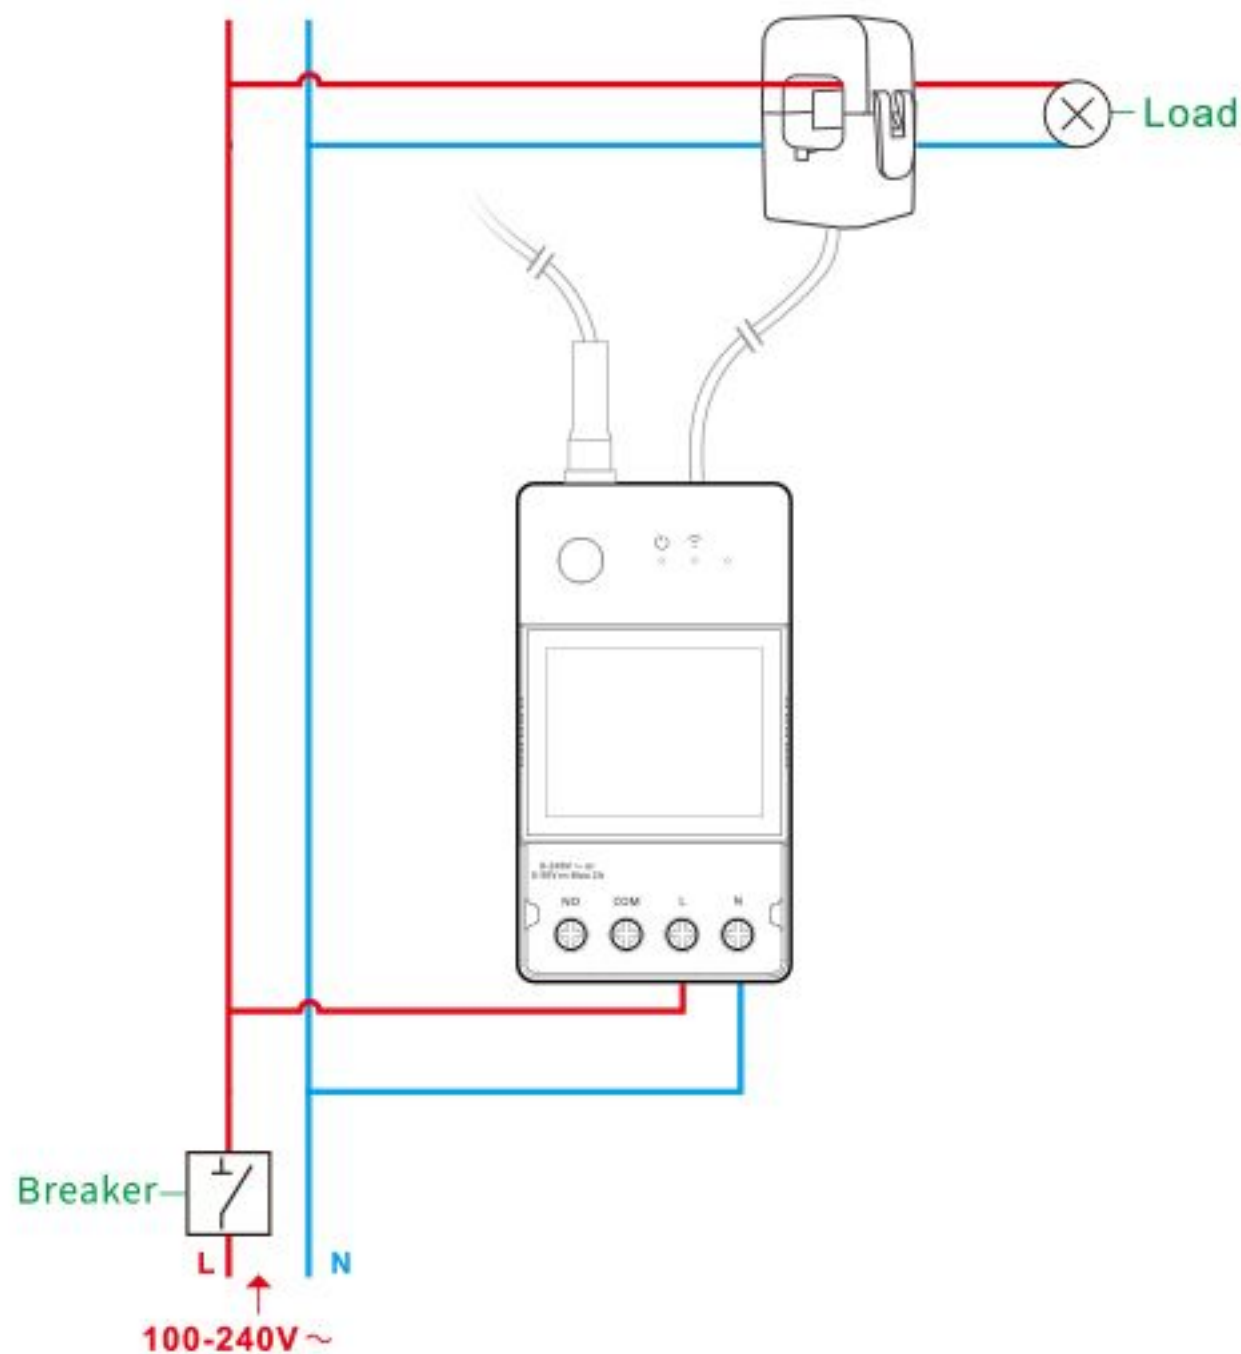

Support eWeLink Web Control

The larger control surface makes the device control more possible.

Wiring Instructions

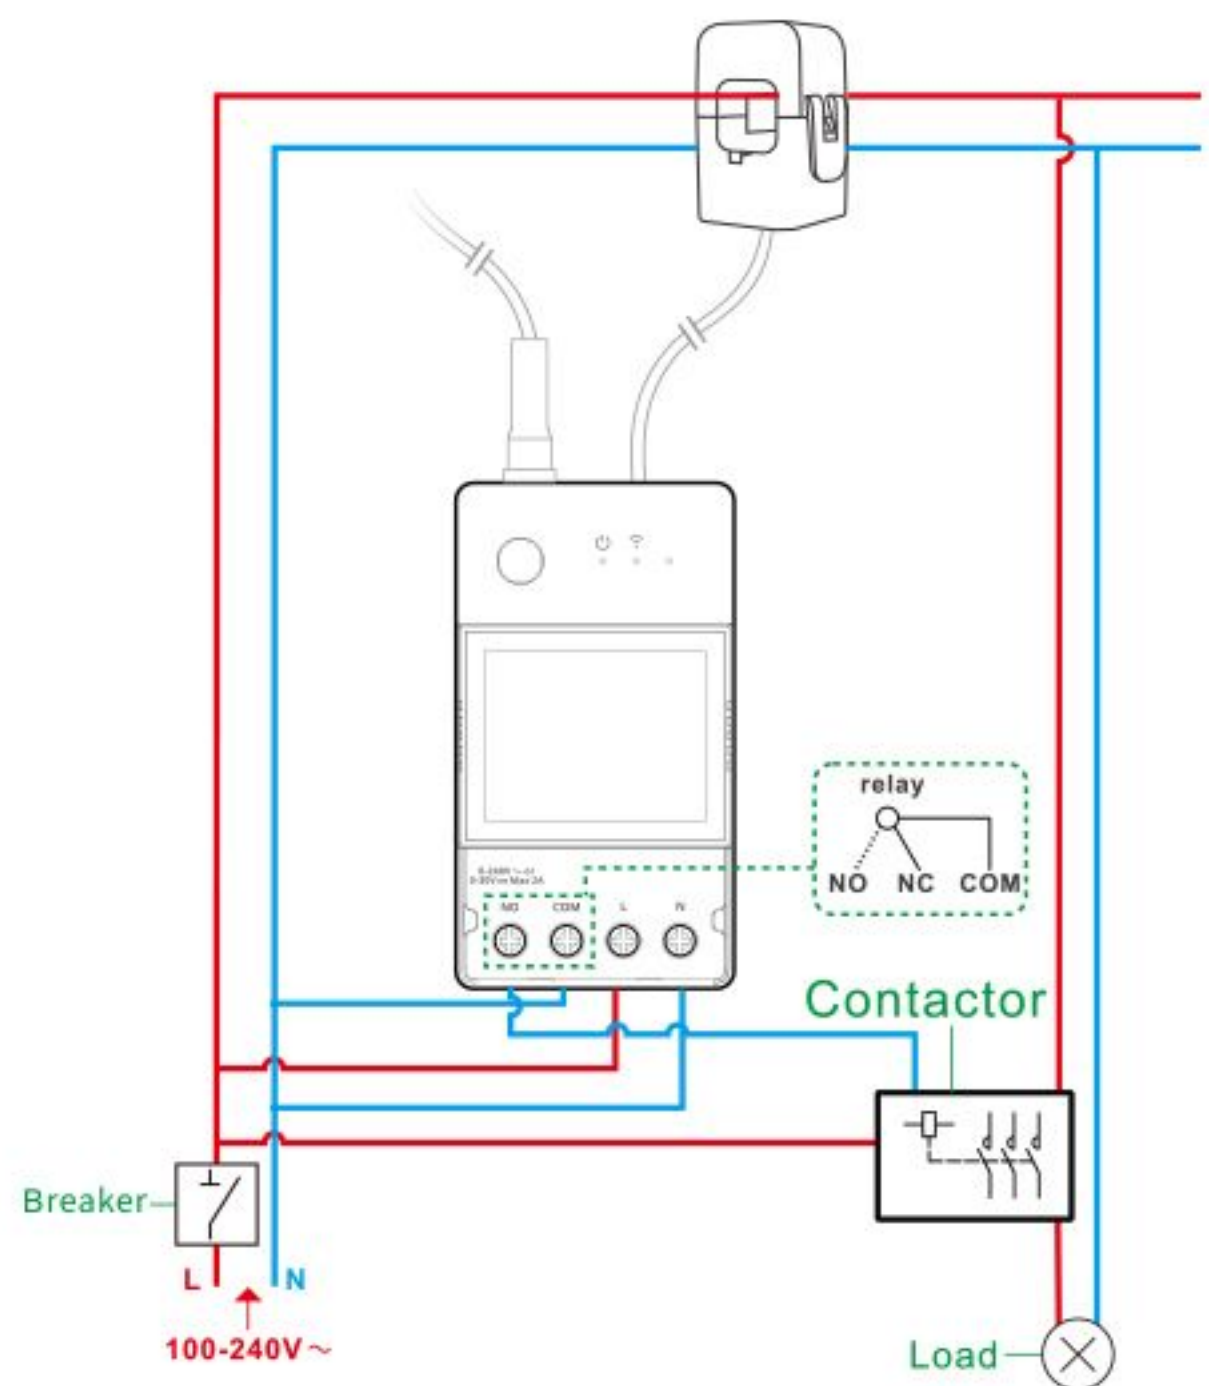

1

Paired with a current transformer to monitor the power consumption of household appliances.

2

Paired with a current transformer and a contactor to monitor the power consumption of household appliances and can also control the power switch.

*The CT clamp must be clamped on the same line as the POWCT's power input to measure power and electricity correctly.

POWR3

What's in the Box

1. Smart power meter x 1
2. Current transformer clamp
(Cable length: 100cm) x 1
3. Antenna (Cable length: 30cm) x 1
4. Silicone Seal Ring x 1
5. Screws x 2
6. Mounting base x 1

Specifications

Model:
POWCT

Rating :
100-240V~ 50/60Hz 2W

Wireless Connectivity :
Wi-Fi IEEE 802.11 b/g/n 2.4GHz

Antenna interface type:
SMA

Transformer interface type :
RJ9

Transformer current detection range :
0-100A

Measurement Category :
CAT II 0-100A 300V~ MAX

Net weight :
120g (Accessories not included)

Product dimension :
98x54x31mm

Color :
White

Casing material :
PC

Applicable place :
Indoor

Working temperature :
-40°C~50°C

Working humidity :
5%~95% RH, non-condensing
